

**2Q09**

OnBioVC tracked 88 financings for 2Q09 versus 71 deals in 2Q08. The second quarter of 2009 combined bioscience investment proceeds totaled approximately \$1,713.6M, an increase of roughly \$538.2M compared to the \$1,175.4M of investments tracked in the second quarter of 2008, yielding a quarter-over-quarter investment increase of ~31%. The first six month capital totals place 2009 at a run rate of \$6,288M; if this value holds than a variance of approximately (\$1,672M) would be expected relative to the 2008 tracked total capital raise of \$7,960M.

The largest deal of 2Q09 went to Boulder, CO-based Clovis Oncology who closed a \$145M Series A financing (*Note: 'A' is not a misprint*); the Company has re-assembled members of the management team from Pharmion (NASDAQ: PHRM) who was acquired in 2007 by Celgene (NASDAQ: GELG) for \$2.9B. Clovis intends to acquire, develop and commercialize innovative anti-cancer agents in the U.S., Europe and additional international markets.

Can you say 'spot the trend'? In the three month period there were 11, yes eleven, cardiovascular device deals closed, accounting for \$178.9M; none of the rounds were any earlier than a B financing (2), the remainder of the deals were for late-stage C (4) and D (5) products. The device dominance did not stop with the CV space, there were 41 devices deals in total or 47% of 2Q09 financings went to this sector.

California continued its dominance in attracting investment dollars. The state was home to 22 financings for 2Q09 accounting for \$493.2M. EX-US was the next most active region, where 13 international financings accounted for \$167.5M in investment. For the quarter all seven US regions had at least a single state close a financing.

The biopharma sector attracted the most investment dollars in 2Q09 (\$868.2M), narrowly out-raising medical device deals (\$743.6M), biofuels accounted for \$85.0M and diagnostic deals raised \$16.8M.

## ONBIOVC-INDEX™ vs. NASDAQ Biotech Index vs. Dow Jones Industrial Average

## Comparing Apples to Bowling-balls:

The OnBioVC-Index™ tracks private bioscience venture investment activity on a relative basis and benchmarks this activity versus the performance of the public markets by charting against the Nasdaq Biotech Index and the broader Dow Jones Industrial Average.

For the month of June 2009, bioscience venture investment activity as tracked by the OnBioVC-Index™ out-performed the streaking Nasdaq Biotech Index on a relative basis by a mere 90bps and bettered the flat-lined broader market DJIA Index by approximately 360bps.

A recent Deutsche Bank life science investor survey sheds some interesting light on a number of products positioning themselves for approval. 77% of investors are expecting approval of Amgen's osteoporosis drug denosumab in October; The approval expectations for Acorda Therapeutics' multiple sclerosis drug Fampridine is not as bullish, only 24% of investors anticipate a 2010 green light; United Therapeutics' pulmonary arterial hypertension drug Tyvaso, is believed to have a 37% chance for approval by years end; and, 2Q09 earnings are expected to be inline for Genzyme, Celgene, Amgen and Biogen Idec while Gilead is anticipated to outperform.

PARTNERS

Bringing together leading investors,  
senior executives and emerging  
companies in the Rocky Mountain  
region to cultivate partnerships within  
the healthcare industry.

See the future of healthcare — and your role in shaping it — at the Rocky Mountain region's first and only life science investor conference.

Some of the most inspired bioscience companies call this region home - and many up-and-coming companies have yet to be discovered in what may well be the most under-farmed region in the US for high-quality investments. Don't miss this chance to see thirty of this region's most innovative private and public life science companies, participate in some of the newest deals and meet those who are shaping the future landscape of the life sciences industry.

**PARTNERS**

Freestone provides outsourced business strategy, product development and commercial insight in the life science industry. Our focus is on delivering integrated solutions to address needs associated with building, growing and investing in early and emerging stage life science companies.

Engagements are geared toward increasing capacity in the development and execution of strategies, expansion or extension of operational depth and ultimately, contributing to accelerated milestone achievement and returns. A value-centric focus is utilized to align objectives and dissolve barriers to success.

Our insight and contributions rely on an appropriate foundation of research and analysis to develop and implement business plans. Deliverables provide solutions to business challenges across a range of needs from advisory projects to interim infrastructure support.

Freestone utilizes extensive operational experience to work with organizations to enhance strategies for growth and accelerate the realization of value.

*Integrated Solutions for Emerging Life Science*

## PARTNERS

Modeled after successful medical research parks across the country, the Colorado Science + Technology Park at [Fitzsimons](#) offers an unrivaled range of opportunity to life science research and development companies of all sizes, from small start-ups to established industry leaders. Within the Park, more than six million square feet of corporate and bioresearch facility space are being developed for companies and firms focusing on the science and technology sectors.

From cutting-edge lab facilities to advanced technical support systems, everything at the Colorado Science + Technology Park at Fitzsimons is designed specifically for the life science industry - turnkey solutions are currently available. It's a place where the best and brightest will come together to take ideas from the bench to bedside; a place where creativity and collaboration reach critical mass.

Forest City Science + Technology Group is a division of Forest City Enterprises, a national real estate development firm founded more than 80 years ago and traded on the New York Stock Exchange. Forest City creates award-winning communities for people to live, work, and play.

The Science + Technology Group, recognized as one of the country's premiere developers of life science campuses, has a completed portfolio of over two million square feet and more than 5 million square feet of wet-lab and office space under development in several major US life science markets including Boston, Philadelphia, Baltimore, Chicago, and Denver.

Forest City Science + Technology Group has the vision, practical experience, and the capabilities to design, build, lease, fit out, finance, operate, and meet the complex needs of each client - from early stage to mature organizations.

**THE  
CBSA  
ADVANTAGE**

---

**The BioScience Industry in Colorado**

Colorado's bioscience industry is poised to become one of the most exciting and advanced clusters in the country. The State is currently home to a thriving industry, comprised of over 400 biotechnology, medical device, pharmaceutical, health care providers, research institutions and those businesses that provide critical services and products to bioscience companies.

**Opportunities for Growth in the Biosciences Industry**

The pipeline of new technologies and new companies emerging from Colorado's research institutions is strong; the number of Colorado bioscience related companies and their employees are growing faster than the national average. At the center of this exciting growth is the Colorado Bioscience Association (CBSA), shaping the policies and developing the programs to help Colorado's companies grow and prosper.

## ABOUT

### **OnBioVC provides timely coverage and comprehensive analysis of global bioscience venture capital investment activity.**

At OnBioVC a free and easy to search database is provided where information queries may be indexed by therapeutic, diagnostic and medical device company, technology, indication, financing-round, close date and geographic region. In addition to the web-based resource, regularly published OnBioVC Trend Analysis studies provide cumulative analytical color by month and quarter. All data aggregated at OnBioVC is also available for delivery to your inbox via a free email or RSS subscription.
